# Introduction to Chemence Cosmetics

Introduction à Chemence Cosmetics | Einführung in Chemence Kosmetik

Specialising in private label products developed for the cosmetics industry and more specifically for use in the professional nail industry. Chemence Cosmetics has an amazing range of UV gels, UV nail polishes and UV/LED soak-off nail polishes.

- UK primary manufacturing and packaging facility serving Europe, Africa, Middle East, Far East & Australasia
- ISO 9001-2008 Accreditation.
- Chemence Cosmetics is the largest European manufacturer of cyanoacrylate nail glue, and a major supplier of nail adhesives across the USA.

# HQ Free Nail Glue

Colle à ongles libre de HQ | HQ Freier Nagelkleber

At Chemence Cosmetics all our nail glues are Hydroquinine free formulations, that comply with all current EU regulations and are approved for sale in both retail and professional markets.

All our nail glues are manufactured according to Good Manufacturing Practice.

Our nail glues are suitable for applying tips, crystals and other adornments.

- Supplied in unbranded or private label formats.
- Adheres to the natural nail & nail tips in seconds.
- Quick setting and long lasting.
- Contact us for quotations on larger volumes or for private label products.

### BRUSH-ON NAIL GLUE 40 cPs

002013NG397A (8g) | 002314NG396A (15g)

Easy-to-apply, low viscosity, brush-on nail glue. Bonds and repairs artificial nails, tips and natural nails.

Very fast drying.

Our specially designed brush-on bottle has a reducer neck, designed to help prevent spilling.

Minimum Order Qty: 1000 (Unlabelled)

### CLEAR NAIL GLUE 40 cPs

002314NG398 (15g) | 002083NG398 (30g)

Sets in seconds to instantly bond full nails, sculptured nails, tips and wraps. This glue may also be used for natural nail repairs.

Our 15g & 30g bottles are a unique design. Using a special co-extruded technique the bottles have an inner clear layer and an outer pigmented wall.

Because the product does not contact the pigmented wall, the product supplied in this packaging exhibits excellent shelf life.

Minimum Order Qty: 1000 (Unlabelled)

### CLEAR NAIL GLUE 40 cPs

001036NG3995 (3g)

Sets in seconds to instantly bond full nails, sculptured nails, tips and wraps. This glue may also be used for natural nail repairs.

Minimum Order Qty: 2000 (Unlabelled)

### CLEAR NAIL GLUE 40 cPs

002020FN40 (2g)

Sets in seconds to instantly bond full nails, sculptured nails, tips and wraps. Convenient size ideal for use with nail art or adornments.

Minimum Order Qty: 5000 (Unlabelled)

### PINK NAIL GLUE 300 cPs

002020NG300P (2g)

Medium viscosity nail glue instantly bonds full nails and tips. The light pink colour has a masking effect.

Minimum Order Qty: 5000 (Unlabelled)

### PRECISION APPLICATION TIP

00990531X

Attaches to 3g, 15g or 30g nail glue bottles to reduce the flow of glue, giving better control for attaching adornments or other forms of nail art.

Minimum Order Qty: 2500

All products available at:

[www.chemence.com/products-services/new-cosmetics](http://www.chemence.com/products-services/new-cosmetics)

# HQ Free Nail Resin

Résine à ongles libre de HQ | HQ Freier Nagelharz

At Chemence Cosmetics all our nail resins are Hydroquinine free formulations, that comply with all current EU regulations and are approved for sale in both retail and professional markets.

All our nail resins are manufactured according to Good Manufacturing Practice.

Our nail resins are suitable for natural nail repairs and for nail wrapping systems to increase strength on nails that are naturally weak, brittle, or damaged.

- Supplied in unbranded or private label formats
- Perfect partners for Chemence China Silk or Fibreglass strips
- May be used with Chemence LA17 or LA18 spray-on / brush-on unscented activators
- Contact us for quotations on larger volumes or for private label products

### BRUSH-ON NAIL RESIN 40 cPs

002013NR397A (8g)

Adds strength to natural nails.  
Use with silk for fibreglass strips to repair and strengthen weak or damaged nails.  
Prevents peeling, bending and splitting.  
Our specially designed brush-on bottle has a reducer neck, designed to help prevent spilling.

Minimum Order Qty: 1000 (Unlabelled)

### CLEAR NAIL RESIN 40 cPs

002314NR398 (15g) | 002083NR398 (30g)

Adds strength to natural nails.  
Use with silk for fibreglass strips to repair and strengthen weak or damaged nails.  
Prevents peeling, bending and splitting.  
Our 15g & 30g bottles are a unique design.  
Using a special co-extruded technique the bottles have an inner clear layer and an outer pigmented wall.  
Because the product does not contact the pigmented wall, the product supplied in this packaging exhibits excellent shelf life.

Minimum Order Qty: 1000 (Unlabelled)

### BRUSH-ON SUPER FAST NAIL RESIN 20 cPs

001039NG20A (6g)

Adds strength to natural nails.  
Use with silk for fibreglass strips to repair and strengthen weak or damaged nails.  
Prevents peeling, bending and splitting.  
Non-clog brush.  
Dries very quickly and provides excellent clarity.  
Super Fast Brush-on Resin can be used for application of tips, rhinestones and fibreglass or silk wraps.

Minimum Order Qty: 1000 (Unlabelled)

### BRUSH-ON CA GEL OVERLAY 1500 cPs

002039NG150277A (6g)

This high viscosity product can be used in conjunction with fibreglass and silk, and also resin to create a strong and flexible overlay for both natural nails and nail extensions. Can be buffed to produce a high gloss finish. Our specially designed brush-on bottle has a reducer neck, designed to help prevent spilling.

Minimum Order Qty: 1000 (Unlabelled)

### CA GEL OVERLAY 1500 cPs

002314NG15028 (15g) | 002083NG15028 (30g)

This high viscosity product can be used in conjunction with fibreglass and silk, and also resin to create a strong and flexible overlay for both natural nails and nail extensions. Can be buffed to produce a high gloss finish. Our 15g & 30g bottles are a unique design. Using a special co-extruded technique the bottles have an inner clear layer and an outer pigmented wall. Because the product does not contact the pigmented wall, the product supplied in this packaging exhibits excellent shelf life.

Minimum Order Qty: 1000 (Unlabelled)

### PRECISION APPLICATION TIP

00990531X

Attaches to 3g, 15g or 30g nail glue bottles to reduce the flow of glue, giving better control for attaching adornments or other forms of nail art.

Minimum Order Qty: 2500

## BRUSH-ON ACTIVATOR

100074LA15 (25 Litre)

For use with Chemence HQ free cyanoacrylate gel overlay.

An accurate and safe way to apply activator.

Easy economical application.

Minimum Order Qty: 1 x 25 Litre (For filling into own packaging)

## SPRAY ON ACTIVATOR

100073LA17 (5 Litre) | 100074LA17 (25 Litre)

For use with Chemence HQ free cyanoacrylate resin. Dries Resin Instantly.

Typically used for wraps or dip systems.

Minimum Order Qty: 1 x 5 Litre (For filling into own packaging)

Minimum Order Qty: 1 x 25 Litre (For filling into own packaging)

## FIBREGLASS STRIPS

0099049X

For use with Chemence HQ free cyanoacrylate gel overlay and nail resin. Strengthens weak, thin nails and repairs broken nails.

Non-fraying mesh.

The fine spun fibre and delicate weave give superb clarity and strength.

Minimum Order Qty: 1000

## CHINA SILK STRIPS

0099045X

For use with Chemence HQ free cyanoacrylate gel overlay and nail resin. Strengthens weak, thin nails and repairs broken nails.

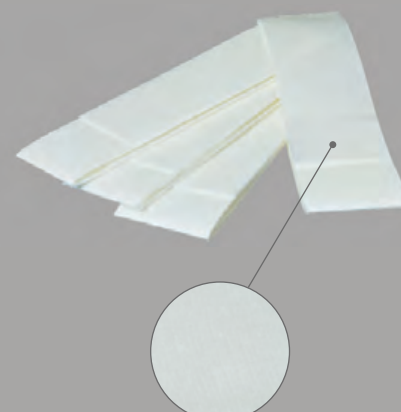

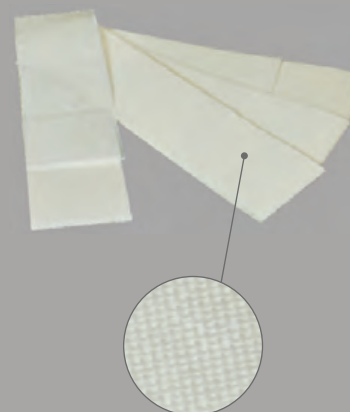

Non-fraying mesh.

Silk has a finer weave than Fibreglass making it less visible when coated with resin.

Minimum Order Qty: 1000

# LED/UV Cure Nail Gels

Gels à ongles LED/UV Cure | LED / UV Cure Nagelgelen

At Chemence Cosmetics we have created a full range of products to give you - the nail tech, everything you require to satisfy your clients; workability, strength, durability, flexibility and a high gloss finish. Whether you need a Builder, Soak-Off or Sculpting Gel, our range has the formulation you need.

- All LED/UV nail gels comply with the requirements of EU Regulation[EC] No. 1223/2009 and are manufactured according to Good Manufacturing Practice.
- Comprehensive range of formulated LED/UV Nail Gels.
- Supplied in bulk containers (for filling into your own packaging).
- Can be filled and packed into pots as required.
- Bespoke formulations can be developed, dependant on volume required. Please contact us for details.

### STANDARD LED/UV NAIL GEL

100076UC1084 (5 Kilos)

This thin gel is simple to apply and self levelling. Cures within 2 minutes under a LED/UV Lamp. Can be used over tips as an overlay, or as a top coat for the thicker sculpting gel. It can also be used with any other system to give a long lasting gloss finish.

Remove by filing gently with a fine file. Requires a primer.

Minimum Order Qty: 1 x 5 kg (for filling into own packaging)

### CLEAR BUILDER LED/UV NAIL GEL

100076UC2044 (5 Kilos)

Self-levelling builder gel.

Cures within 2 minutes under a LED/UV Lamp. Easy to apply and doesn't require much filing. Apply after base gel or directly over the prepared nail plate. Available in a selection of natural transparent colours.

Requires a primer.

Minimum Order Qty: 1 x 5 kg (for filling into own packaging)

### MASK BUILDER LED/UV NAIL GEL

100076UC1138 (5 Kilos)

A high viscosity, self levelling builder gel promoting a natural nail colour.

Cures within 2 minutes under a LED/UV Lamp. Easy to apply and doesn't require much filing. Apply after base gel or directly over the prepared nail plate.

Requires a primer.

Minimum Order Qty: 1 x 5 kg (for filling into own packaging)

### LOW HEAT LED/UV NAIL GEL

100076UC1128 (5 Kilos)

This gel prevents heat generation even for the most sensitive nail plates. It is a flexible, hard wearing gel with a high gloss finish. It is self levelling which helps to avoid flooding of the cuticle.

To use with forms or over tips.

Requires a primer

Minimum Order Qty: 1 x 5 kg (for filling into own packaging)

### SCULPTING LED/UV NAIL GLUE

100076UC1092 (5 Kilos)

Ideal for building perfect overlay shapes over nail tips or for building sculptured self levelling nails. The Sculpting Gel is easy to apply and strong yet flexible.

Cures within 2 minutes under a UV lamp.

Remove by filing gently with a fine file.

Requires a primer.

Minimum Order Qty: 1 x 5 kg (for filling into own packaging)

### THIN WHITE TIP LED/UV NAIL GEL

100076UC1122 (5 Kilos)

A thin viscosity extra white gel.

For best results apply in two thin layers and cure each layer for 2 minutes.

Minimum Order Qty: 1 x 5 kg (for filling into own packaging)

All products available at:

[www.chemence.com/products-services/new-cosmetics](http://www.chemence.com/products-services/new-cosmetics)

# LED/UV Curing Top Coats

LED/UV durcissant les manteaux supérieurs | LED/UV-härtende Top Coats

All our LED/UV Topcoats comply with the requirements of EU Regulation [EC] No. 1223/2009 and are manufactured according to Good Manufacturing Practice.

- Stunning and versatile high gloss LED/UV Dual curing colour Top Coats.
- Incredibly easy to apply.
- No wiping or filing required.
- Ideal as finishing Top Coat for an even, high gloss result.
- Available in bulk containers or filled into brush-on bottles.

## 5KG BULK PACKED

or for private label products.*

# Polish To Gel Topcoat

Vernis à ongles effet gel Topcoat | Nagellack zu Gel Topcoat

UP14 LED/UV Curing High Gloss Gel Topcoat is an innovative new product that creates a luxurious hard wearing, high shine gel effect when applied over any regular surface dry nail varnish. With just a UV/LED lamp and the “Polish to Gel” top coat, you can get an extra glossy finish on any polish, as well as a long lasting, durable colour.

- Absolutly no damage to the natural nail.
- The product is legally certified and retail ready
- The product has been independently tested by a representative panel, with a variety of different nail types.

## **DIRECTIONS:**

- Apply the nail varnish and leave to surface dry for approx. 15-20 minutes before applying UP14 UV/LED Curing High Gloss Soak-Off Topcoat.
- Once cured for two minutes with either a LED or UV lamp, the the manicure instantly becomes diamond hard which dramically extends the longevity of any regular nail varnish.
- Apply the nail varnish and leave to surface dry for approx. 15-20 minutes before applying UP14 UV/LED Curing High Gloss Soak-Off Topcoat. Once cured for two minutes with either a LED or UV lamp, the manicure becomes diamond hard.

## POLISH TO GEL TOPCOAT

- Drying time is significantly reduced, nails are completely dry after removing any sticky residues with Finishing wipe\*, meaning that no scuffs or marks will be left on the varnish.
- Easily removed with acetone based remover, this topcoat is an essential addition to any manicure regime.

*\* Finishing wipe used should not contain moisturisers, as this will affect product performance*

### 5KG BULK PACKED

#### UP14 (5 Kilos) - Clear “Polish to Gel” Topcoat

Minimum Order Qty: 1 x 5 kg (for filling into own packaging)

or for private label products.*

## LED/UV CURING SOAK-OFF NAIL POLISH RANGE:

An application video can be found on our YouTube Channel under: Chemence Cosmetics -  
**Chemence 3 Step Gel Polish Application Video**

# LED/UV Curing Peel-off Gel Polish

Polymérisation LED / UV Peel-off vernis à ongles  
LED / UV-Härtung Peel-Off-Nagellack

Our professional 3-Step UV/LED cured Peel-off gel polish is one of the most revolutionary and technically advanced gel polish systems of its kind. Unlike traditional soak-off gel polish systems that entail lengthy and arduous acetone soak-off removal processes, our 3-Step Peel-Off Gel Polish system features easy to remove peel-off technology, yet still provides the high shine of a traditional gel manicure.

This nail-friendly, flexible formulation has been specifically designed to leave nails healthy and undamaged and will cure under both LED and UV lamps.

Using advanced elasticised polymer technology, our Peel-off Gel Polish lightly bonds to curvature of the natural nail to create a strong, scratch and chip-resistant shield over the surface of the nail, which can be gently peeled off when desired, without damaging or destroying the nail underneath!

Our dual-purpose UV/LED Peel-Off polishes can be applied in 3 simple steps, using our Peel-Off Top & Base Coat in combination with one of our 14 vibrant Peel-Off colours.  
(Please see full colour chart shown on the next page).

*Professional and retail formulations are available.*

# HQ Free Resin/Acrylic Dipping System

HQ Résine libre de HQ/système de trempage acrylique  
HQ Frei Harz/Acryl Tauchsystem

The new Resin/Acrylic dipping system is a fantastic method of applying permanent colour to the nail and offers a great alternative to gel polish.

The system is quick and easy to apply, saving a nail technicians time when creating a full manicure.

Chemence has developed a **HQ Free Builder Resin** and a **HQ Free Gel Overlay** - together with a **Brush on Activator** - specifically formulated for use with dipping powder systems.

## **DIRECTIONS:**

- First, prepare and file the nail to the desired shape and clean away any dust with an IPA wipe.
- Apply the Builder Resin to the natural nail or to an artificial nail tip. While still-wet immediately dip the nail into the coloured acrylic powder. Repeat the process until the desired result is achieved.
- Apply a layer of Gel Overlay as a final topcoat over the system for a high shine finish.
- Immediately apply Brush On Activator to set and harden the nails.
- Lightly buff the nails using a 3 way buffer until desired shine is achieved.

### 14ML BRUSH-ON BOTTLE

LA19 (14ml) - Dipping System Brush on Accelerator

LA20 (14ml) - Dipping System Brush Saver

Minimum Order Qty: 500 of each product (unlabelled)
