THE CHEMENCE GROUP

We are a privately owned group of companies established in 1983 with manufacturing and packaging facilities in the UK, USA, France and Spain.

CHEMENCE COSMETICS

Private Label Cosmetic Manufacturer

Welcome to Chemence Cosmetics. Chemence Private Label Cosmetics leads the way in the development of high quality and innovative products for the cosmetics and beauty industry.

With over 30 years of experience in manufacturing cyanoacrylate adhesives and UV curing nail products, Chemences' highly skilled workforce and world-class development chemists continually strive to provide exceptional service to all our clients.

Over the years, we're proud to have earned the trust and loyalty of countless customers. That's because our products are formulated with quality ingredients and the latest technologies to meet the highest industry standards.

Chemence Cosmetics offers nail glues and nail resins together with a wide range of HEMA & Di-HEMA free LED/UV cured nail coatings and builder gels.

- ◆ UK primary manufacturing and packaging facility
- ◆ Worldwide customer base
- ◆ ISO 9001:2015 accreditation
- ◆ Manufacture to GMP

NAIL GLUE

OUR NAIL GLUE

All our Nail Glues are based on HQ-free formulations and can be supplied in unbranded or private label formats. Our Nail Glues are long lasting and rapid setting (in 5 seconds or less!) and give a strong and long-lasting bond between the artificial tip and natural nail.

Chemence's Nail Glue range contains a variety of formulations, including low, medium and high viscosity versions, all of which are available in either standard nozzle bottles or specially designed brush-on bottles with reducer necks to prevent spilling.

Our uniquely designed 15g & 30g bottles (suitable for use with precision application tips) incorporate a special co-extruded double wall design, whereby the inner wall of the bottle prevents the product from coming into contact with the white pigmented outer wall, so as to extend the shelf life of the product.

NAIL RESINS, OVERLAYS & ACTIVATORS

RESINS, OVERLAYS & ACTIVATORS

Chemence's Resins and Overlays are all based on HQ-free formulations and can be supplied in unbranded or private label formats.

Our Resins and Overlays range from low viscosity versions for quick natural nail repairs to high viscosity versions for gel overlays, all of which are available in either standard nozzle bottles or specially designed brush-on bottles with reducer necks to prevent spilling.

To instantly dry the resin and speed up the process use Chemence Cosmetics' LA17 Unscented Spray-On or LA15 Brush-On Cool Mint Activators. Our easy-to-use Brush-On Activator prevents the activator from touching the skin. Our fast-setting Spray-On Activator, is less harsh than traditional spray on activators, resulting in a quick, smooth finish.

All our resins are also suitable for use in conjunction with Chemence Cosmetics' China Silk or Fibreglass Strips.

EYELASH ADHESIVES

EYELASH EXTENSION ADHESIVES

Chemence's eyelash adhesives range includes individual eyelash extension adhesives, cluster/flare lash adhesives and latex and latex free adhesives for striplashes. Chemence supplies eyelash adhesives to major professional and retail brands in the US and UK and is renowned for its high-quality products and industry expertise.

INDIVIDUAL EYELASH EXTENSION ADHESIVES

ETHYL CYANOACRYLATE

Our quickest drying, fastest curing and most popular eyelash adhesive. Offering superior bonding strength, our durable adhesives have been formulated to maximise the life of each eyelash extension. Our ethyl cyanoacrylate individual eyelash extension adhesives are cosmetically approved and have a guaranteed shelf life of 12 months when stored according to our guidelines - and do not have to be kept in a refrigerator.

MOQ: 1,000 pieces (Private Label)

MOQ: 500 pieces (Unbranded)

LO ODOUR CYANOACRYLATE

Lo-Odour, fast-curing adhesive ideal for users that are sensitive to adhesive fumes and smells. With the perfect combination of bonding strength and speed of use, the Lo-Odour adhesive provides excellent flexibility and workability.

MOQ: 1,000 pieces (Private Label)

MOQ: 500 pieces (Unbranded)

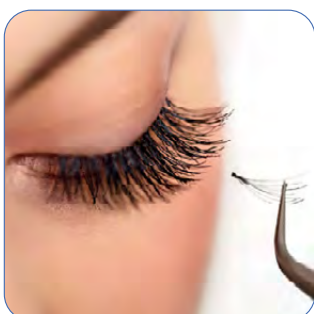

N-BUTYL CYANOACRYLATE

Medical-grade, fume-free adhesive that offers a 'safer' alternative to standard eyelash extension adhesives. Ideal for sensitive eyes, this medical-grade adhesive is based on the latest technological developments to come out of the wound closure field. Inherently bacteriostatic and highly refined, this fume-free adhesive offers great workability and strong hold.

MOQ: 1,000 pieces (Private Label)

MOQ: 500 pieces (Unbranded)

INDIVIDUAL FLARE/CLUSTER LASHES

This solvent based adhesive is for use on individual flare lashes and cluster lashes only, it is not for use on strip lashes. It gives a safe, firm hold and offers ease of application with good durability and a long shelf life.

STRIPLASH ADHESIVES

LATEX-BASED ADHESIVE

Latex based eyelash adhesive that is cosmetically approved and ophthalmologist and dermatologists tested. Our latex adhesive is non-irritant and contact lens friendly. All formulations are free from harmful added ingredients such as Formaldehyde, Parabens and Phthalates. Available in either Black or White (dries clear) for strong, all day hold.

SIZES

- 1g Pipette (Plastic Round)
- 7g Tube

COLOURS:

- Clear/Black

NON-LATEX (ACRYLIC) ADHESIVE

Alternative for those users with a latex allergy, our acrylic based striplash adhesives offers the same benefits and strong, all day hold as our traditional latex adhesives. All formulations are free from harmful added ingredients such as Formaldehyde, Parabens and Phthalates. Also available in Black and White (dries clear).

SIZES

- 1g Pipette (Plastic Round)
- 5g Brush-On Bottle

COLOURS

- Clear/Black

BUILDER GELS

LED/UV BUILDER GELS - HEMA & Di-HEMA FREE

Our range of builder gels are easy to use, high quality and are ideal for building perfect overlay shapes over nail tips or for building sculptured, natural nail extensions.

Chemence's team of expert UV chemists are continually working to develop better performing nail systems. Our builder gel range is dual purpose and cures under both UV and LED lamps.

Our Standard, Builder and Thick Builder gels are supplied either in 5kg pails or filled into our 40g pots as required by the customer. For larger volumes, we may be able to offer bespoke colours according to the customer's specification – please contact us for further details.

ADHESION ENHANCER

Our LA28 Adhesion Enhancer is HEMA & Di-HEMA free and contains no harmful acids. It is recommended for use with any and all of Chemence's builder gel range to give maximum adhesion and to ensure long-lasting wear.

**Available in 5kg/ 14ml Bottles*

STANDARD GEL CLEAR

This gel is ideal for natural nail overlays and to create short nail enhancements or sculptured nails. The thinnest of our traditional hard gels, this is the next step for clients who require a more robust nail finish without adding bulk. A self-levelling gel, this product can be applied in layers to create the desired nail structure

– we recommend thin layers to allow you to control the product throughout application. For an even longer lasting bond, we recommend using our **LA28 Adhesion Enhancer**. When it comes time to remove the Standard Gel, gentle filing is required.

BUILDER GEL CLEAR

Part of our traditional gel range, this product allows you to apply to a longer natural nail to provide a natural nail overlay or to create a longer nail enhancements or sculptured nail. Thicker than our Standard Gel, Builder Gel is ideal for clients who need the extra strength this product will provide. A self-levelling gel, this product can

be applied in layers to create the desired nail structure. Although self-levelling, larger beads can be applied to create the structure needed in less applications. For an even longer lasting bond, we recommend using our **LA28 Adhesion Enhancer**. When it comes time to remove the Builder Gel, gentle filing is required.

THICK BUILDER GEL CLEAR

The thickest product in our traditional gel range. Thick Builder Gel will allow you to create long nail enhancements and sculptured nails but can still be used to create natural nail overlays. Ideal for clients who are heavy on their nails, this gel will provide strength and structure to any nail. It is partially

self-levelling, so application can be achieved using larger beads that can be moved around the nail to achieve the desired finish. For an even longer lasting bond, we recommend using our **LA28 Adhesion Enhancer**. When it comes time to remove the Thick Builder Gel, gentle filing is required.

BUILDER-IN-A-BOTTLE CLEAR

Ideal for clients that want to maintain their natural nails. Applies straight from the bottle using the brush provided. The Builder in a Bottle will provide strength to the natural nail without adding bulk and can be used to create short, sculpted nails or enhancements if the client requires. Available in various colours to allow you to create the perfect finish for the client.

Our soak off gel polish can be applied directly over the Builder In A Bottle Clear after curing - or if preferred, the surface can be cured, cleansed, refined and then soak off gel polish colour added. To remove, gently file the surface and then soak off in your usual way.

Builder In A Bottle Clear does **not** require the use of LA28 Adhesion Enhancer.

“NAIL POLISH-TO-GEL” TOP COAT CLEAR

“Polish to Gel” is an innovative top coat that transforms any ordinary nail polish into a hardwearing, high-shine gel-like varnish, with the appearance of a professional gel polish. This easy to use, one-step product is used to create professional quality salon results by simply curing for just 1 min under a LED lamp to give an instant gel-effect (or 2mins under a UV lamp).

The “Polish to Gel” Top coat gives an extra glossy finish to any nail polish, whilst also providing the longevity and shine of a gel manicure. Unlike traditional gel polish systems, our “Polish to Gel” Top coats do not restrict users to a limited selection of gel polish colours but can be used in conjunction with any nail polish colour or brand.

GEL POLISH

SOAK-OFF LED/UV GEL POLISH

HEMA & Di-HEMA Free Range

Chemence's professional LED/UV gel polish is one of the most technically advanced gel polish systems available. Combining a high gloss finish with deep colour pigment coverage, our hard wearing and durable gel polishes are designed to be chip, scratch and lift off resistant. Free from both HEMA and Di-HEMA, our nail friendly formulations are designed with safety in mind.

Our soak off gel polish colour library contains over 6,000 exciting colours with seasonal collections released every year.

Contact us to discuss your bespoke private label requirements or colour matching options.
